

ALONGKORN SANSAWAT

PRODUCTION & MANUFACTURING LEADER

Operations Management | Lean Manufacturing | Greenfield Factory Setup | Supply Chain Improvement

Senior Manufacturing Leader with 14+ years of experience in appliance manufacturing, production management, and industrial engineering. Proven success in greenfield factory setup, scaling production from 200 to 7,000 units/day, leading 800+ employees, and driving productivity, cost, and logistics improvements. International experience includes a business assignment at Samsung HQ (South Korea) and leading supplier transformation across four strategic suppliers. Strong expertise in Lean Manufacturing, Kaizen, TPS, and Supply Chain Optimization.

※ KEY ACHIEVEMENTS (CARRER HIGHLIGHTS)

※ CORE COMPETENCIES

Manufacturing/ Productivity

- . Greenfield Factory Setup
- . Lean/ Kaizen, Continuous imp.
- . Takt time Optimization
- . Production Management
- . Line Balancing
- . Manufacturing Strategy
- . Cost Reduction & Cost Control

Quality

- . ISO 9001, 14001, 45001
- . Root Cause Analysis (RCA)
- . Corrective & Preventive Action
- . Incoming / In-Process / Final Inspection
- . Customer Complaint Analysis
- . PFMEA
- . Internal Audit Support

Supply Chain & Logistics

- . Material Flow Optimization
- . FIFO
- . JIT (Just-in-Time)
- . Direct Loading System
- . Delivery Performance (OTD)
- . Logistics Cost Reduction
- . Transportation Optimization

Digital & AI Transformation

- . AI-assisted Development
- . Real-time Production Monitoring
- . KPI Dashboard
- . Downtime Dashboard
- . Cost Control Dashboard
- . Face Scan – Smart attendance
- . Smart Factory

※ PROFESSIONAL EXPERIENCE

Haier Appliance Manufacturing (Thailand) Co., Ltd.

Production Manager (2025-Present)

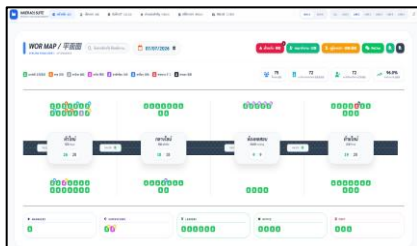

May 2025 – Present

Leading end-to-end manufacturing operations during greenfield plant establishment and aggressive scale-up phase

- . Scaled daily production capacity from 200 to 700 units/day within 7 month
- . Managed 800+ employees and improved labor productivity 65% though line balancing and skill optimization
- . Established Skill Matrix & Multi-skill certification system, operator skill coverage rate increased to 85%
- . Established Standard Time (ST) for 100% of processes enabling accurate capacity planning and forecasting.
- . Enforced WI & SOP compliance 100% supporting audit readiness and production consistency.
- . Increased production capacity from pilot production 10 UPH → 350 UPH within 7 months though process optimization
- . Achieved production plan attainment consistently 95% during ramp-up under aggressive volume targets.
- . Reduced startup inefficiencies and non-value-added activities by 35% though Lean Manufacturing deployment.
- . Maintained stable SQDC performance (Safety, Quality, Delivery, Cost) during rapid scale-up
- . Led cross-functional governance across production, Engineering, Quality, Maintenance and Logistics for fast issue resolution
- . Control OT in the production line (RBA)

Digital Transformation & AI Innovation.

- . Developed AI-powered production management applications using AI-assisted software development.
- . Built real-time dashboards for Production Plan vs. Actual, Manpower, Labor Cost, Inventory, and Productivity KPIs.
- . Automated daily production reporting, reducing manual reporting effort and improving data accuracy.
- . Enabled real-time decision-making through digital KPI visualization for production leaders.
- . Supported Industry 4.0 initiatives by integrating AI-driven workflow automation into manufacturing operations.

EDUCATION

Bachelor's Degree

Silpakorn University, 2012

TOOLS & SYSTEMS

- . AutoCAD (2D)
- . Sketchup (3D)
- . Siemens Process Simulation
- . MES/ SAP (Basic)
- . Microsoft Office Word, Excel, PowerPoint
- . Dashboard Monitoring

ALONGKORN SANSAWAT

PRODUCTION & MANUFACTURING LEADER

Operations Management | Lean Manufacturing | Greenfield Factory Setup | Supply Chain Improvement

※ PROFESSIONAL EXPERIENCE

Thai Samsung Electronics Co.,Ltd.

Jun 2012 – 2025

Production Innovation Manager (2018-2025)

- Led the development of 1-, 2-, and 3-year operational strategic plans, driving capacity expansion, productivity improvement, automation, and sustainable cost reduction.
- Forecast Capacity and Manpower to Minimize the cost.
- Reduced production manpower from 406 to 140 operators (65% reduction) while sustaining production capacity and quality performance.
- Conducted DFM and DfX analyses to identify automation opportunities and simplify manufacturing processes.
- Led automation projects that eliminated manual operations, reduced labor requirements, and improved production stability.
- Redesigned production layouts and material flow to maximize space utilization and operational efficiency.
- Optimized manpower through Standard Time (ST) development, work standardization, and line balancing.
- Implemented Lean Manufacturing and Kaizen initiatives to eliminate waste and improve productivity across multiple production lines.
- Partnered with cross-functional teams to ensure successful implementation with minimal production disruption.
- Eliminated Night shift by improving daytime production capacity and operation efficiency.
- Develop Zero trolley Direct loading logistics system, reducing transportation waste and improving material flow.

Special Assignment – 4 Supplier Development Program

Executive Sponsor: Managing Director (MD)

- Appointed by the Managing Director to lead a strategic supplier development program, driving operational excellence across four key suppliers supporting Thai Samsung Electronics.
- Led cross-functional supplier improvement initiatives focused on Productivity, Quality, Automation, and Logistics performance.
- Conducted end-to-end operational assessments to identify performance gaps and establish improvement roadmaps aligned with Samsung manufacturing standards.
- Collaborated with supplier management teams to implement automation projects, optimize production layouts, and improve material flow.
- Coached and mentored supplier leadership teams on best practices in production management, quality systems, and operational excellence.

Production Innovation Assistance Manager (2016-2017)

- Led Kaizen project that reduced production cycle time and improved line efficiency.
- Facilitated Root Cause Analysis (RCA) using 5Why, Fishbone and PDCA methodologies.
- Standardized production process using Standard Work and Visual Management.
- Coordinated cross-functional improvement project with IE, Quality and Maintenance.
- Supported implementation of Lean Manufacturing and TPS initiatives.

International Assignment

Samsung Electronics HQ (South Korea)

Business Improvement Program : Supply Chain Optimization | Logistics Process Improvement | Manufacturing Innovation

- Benchmarked Samsung global best practices in supply chain and logistics.
- Learned and applied material flow optimization, inventory control and logistics efficiency.
- Collaborated with Samsung HQ engineering and logistics teams.
- Applied improvement concept to enhance operations at Thailand manufacturing plant.

Industrial Engineer (2012-2015)

- Conducted time study and motion study for manpower optimization.
- Designed production line layout using AutoCAD and Sketchup.
- Established Standard Time (ST) and improved Overall Equipment Effectiveness (OEE)
- Developed Work Instruction (WI) and Standard Operating procedures (SOP)
- Supported New Product Introduction (NPI) and manufacturability improvement.
